PISTON RING FILER

84-36064

Piston ring filer

INTRODUCTION:

Secure the fastening bracket to the base of the filer, by means of the screw and nut supplied. Please see drawing below. By using the bracket the filer may be screwed to the work bench or can be held in a bench vise. This will support the tool while filing the piston ring.

To File Piston Rings:

Lay the ring on top of the guide plate and against the tapered locators. Compress the ring to force the ends lightly against the sides of the cutting wheel. Turn the handle in the direction indicated by the arrow to produce a clean parallel cut.
